Egg, sperm and embryo (both de-identified and known)

Regardless of the reasons people access donor sperm, eggs or embryos, taking the step can be overwhelming and isolating without the right support. Whether you are a woman seeking to start a family on your own, a same-sex couple starting your family or a couple who are experiencing infertility, donor conception can be a wonderful opportunity for intending parents to fulfill their dreams of starting or growing their family.

Our counsellors are here to help you on your journey towards parenthood via donor conception, and to answer your questions about parenting a donor conceived child.
